## Editors' Foreword

In the tenth volume of the series of publications entitled *Studien zum Burgwall von Mikulčice* we return to the systematic publication of selected categories of the movable finds from excavations of the early mediaeval stronghold of Mikulčice. This time it is a particularly important category – swords. The set represents all the specimens found so far in Mikulčice – a total of 16 complete swords from grave units and 5 fragments from settlement contexts. As with other previously published systematic categories of movable finds, these are predominantly finds from the phases of large-scale excavations carried out between 1954 and 1992; the set has now been expanded to include one new find: the sword hilt found using a metal detector in 2011. All the finds were obtained during systematic archaeological excavation carried out at the site since 1954 by the Institute of Archaeology of the Academy of Sciences of the Czech Republic, Brno.

The swords from Mikulčice form a unique collection, the quality of which depends primarily on the find circumstances. The fact that all 16 swords belong to specific graves at particular burial sites in a single locality make this set a unique source for studying social and cultural relations in Mikulčice and Great Moravia. The sword is not only a weapon and a masterpiece of the metal-worker's craft, but is a particular symbol of the social status of the highest-ranking elites in early mediaeval society. The relatively narrow dating, limited to the 9<sup>th</sup> century, also makes this

collection unique in terms of the comparative study of European weapons of the Early Middle Ages. The swords from Mikulčice are mostly products of foreign provenance, and therefore the study of these finds raises a number of questions concerning political, cultural, economic and social relations within Central Europe as it existed back then. They are excellent proof of contact with the Frankish environment.

The systematic evaluation of the swords from Mikulčice commenced back in 2002, when Jiří Košta began preparing his Master's thesis in Mikulčice. This meant that the basic documentation work was carried out before the tragic fire at the Mikulčice site in 2007, which seriously damaged most of the specimens. Prior to 2007 samples had also been taken for exact analysis, which later served as the basis for team work with Jiří Hošek. Both researchers – Jiří Košta as the archaeologist and Jiří Hošek as the metallographer and archaeometallurgist – then returned to the collection damaged in the fire, supplemented their work with further analyses, and prepared this comprehensive evaluation.

Around 50 years after the discovery of most of the Mikulčice swords, a fully-fledged assessment of these finds is now being published. Obviously, the information value of old finds is very limited considering the excavation methodology used at the time and the standard of documentation compiled. Information has also been lost due to the sheer amount of time that has passed.

This, however, is the fate of most of the archaeological sources from excavations carried out at the Mikulčice stronghold. On the other hand, this is still a valuable collection that requires processing in a comprehensive manner. This publication is the funded result of many years of detailed analytical work performed by both authors. It is also a good example of how 'old' material can be worked with and what results can be obtained, despite the limitations described above.

The editors of the *Studien zum Burgwall von Mikulčice* series have always striven to give each volume in the series a specific theme; these were initially in the form of anthologies. After

anthology publications were degraded by the Czech system of evaluating science and research to less than fully-fledged scholarly publications, a change needed to be made to the form of the various volumes. They will now be increasingly published as monographs, and will be more frequently in English. However, the essence remains the same: *Studien zum Burgwall von Mikulčice* will continue to be primarily a critical source-based publication focusing on the topic of early mediaeval Mikulčice and intended for the international scholarly community.

*Lumír Poláček, Pavel Kouřil*

## Contents

<b>Introduction</b> .....	<b>9</b>
<b>1. Mikulčice in the Early Middle Ages</b> .....	<b>11</b>
1.1 Mikulčice, the power centre of the Great Moravia .....	11
1.2 Topography of the contexts in which the Mikulčice swords and sword-parts were found	15
1.2.1 The burial grounds and the grave-finds of swords .....	15
1.2.2 Sword-parts from the settlement contexts .....	24
<b>2. The current state of knowledge of early medieval swords</b> .....	<b>25</b>
2.1 A definition of terms .....	25
2.2 A basic outline of the development of early medieval swords .....	25
2.3 The classification of early medieval swords .....	29
2.4 The collection of data concerning European swords from the period between the second half of the 8 <sup>th</sup> century and the 11 <sup>th</sup> century .....	41
2.5 The collection of data on early medieval swords in the Czech Republic .....	46
2.6 Brief overview on early mediaeval sword finds in the territory of Moravia .....	47
<b>3. Investigation of the Mikulčice swords</b> .....	<b>53</b>
3.1 Methodology and history of the investigation into the Mikulčice swords .....	53
3.2 Typological evaluation of the swords .....	56
3.3 Nomenclature and analytical methods used .....	57
3.4 Individual swords and their archaeological contexts .....	60
3.4.1 Sword from the grave 90 .....	60
3.4.2 Sword from the grave 265 .....	70
3.4.3 Sword from the grave 280 .....	81
3.4.4 Sword from the grave 341 .....	87
3.4.5 Sword from the grave 375 .....	98
3.4.6 Sword from the grave 425 .....	111
3.4.7 Sword from the grave 438 .....	123
3.4.8 Sword from the grave 500 .....	134
3.4.9 Sword from the grave 580 .....	145
3.4.10 Sword from the grave 715 .....	155

3.4.11 Sword from the grave 717 .....	168
3.4.12 Sword from the grave 723 .....	179
3.4.13 Sword from the grave 805 .....	193
3.4.14 Sword from the grave 1347 .....	207
3.4.15 Sword from the grave 1665 .....	218
3.4.16 Sword from the grave 1750 .....	225
3.4.17 Crossguard from the 'Kostelisko' .....	234
3.4.18 Upper hilt from the acropolis .....	235
3.4.19 Pommel from the northern extra-mural settlement .....	236
3.4.20 Pommel of an upper hilt from the acropolis .....	236
<b>4. Typology and chronology of Mikulčice swords .....</b>	<b>239</b>
4.1 Summarization of sword-types by the hilts found in Mikulčice .....	239
4.1.1 Swords with a triangular pommel .....	241
4.1.2 Petersen type K (Geibig 6) .....	246
4.1.3 Petersen type N (Geibig 8) .....	248
4.1.4 Petersen type X (Geibig 12, variant I) .....	249
4.1.5 Petersen type Y (Geibig 13, variant I) .....	251
4.2 Difficulties with the typological and morphological classification of blades .....	253
4.3 Chronology of the contexts in which the Mikulčice swords were found .....	261
<b>5. Manufacture of the Mikulčice swords .....</b>	<b>271</b>
5.1 Manufacture of blades and hilts of the Mikulčice swords .....	271
5.1.1 Blades .....	271
5.1.1.1 Internal structure and heat treatment of blades .....	271
5.1.1.2 Shape of blades .....	279
5.1.1.3 Signs and inscriptions on blades .....	281
5.1.2 Hilts .....	285
5.2 The scabbards, straps and wrappings of swords from the Mikulčice assemblages .....	288
5.3 The question of the provenance of the Mikulčice swords .....	294
<b>6. The swords from Mikulčice as status symbols .....</b>	<b>297</b>
6.1 The Mikulčice burials with swords and their grave goods .....	298
6.2 Remarks on the social interpretation of swords deposited as grave goods in Great Moravia .....	306
6.3 Remarks on the interpretation of the social position of men buried with swords in early medieval Mikulčice .....	307
